Turfgrass Weed Control & Fertilizer Applications Begin Saturday April 3rd

Herbicides will be Applied Important to Stay off Grass

Weed Control & Fertilizer

Pre & Post Emergent herbicides will be applied by professionals Saturday April 3rd for weed control on Greenspace turf areas.

- ✔ Residents will not be allowed to walk on paths while areas are being sprayed.
- ✔ Keep off Grass Signs will be posted when treatments begin.
- ✔ Residents & pets should stay off grass areas until Monday April 5th.
- ✔ Please do not cut the Greenspace grass. Herbicides are more effective with weed head attached during treatment.

Grass Cutting Begins Week of Monday April 5th

Greenspace turf will be cut at 4-inch length as recommended by turf professionals. This length is best for controlling weeds, allowing the new fescue to thicken and stay hydrated and green without irrigation.
